- ✓ Public viewing of inspections
- ✓ Financial Management
- ✓ Document Management
- ✓ Off-line field capability
- ✓ Form-based field solution

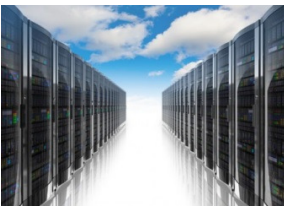

Trusted ▪ Diversified ▪ Financially Secure ▪ Experienced

Federal, state and local Environmental Health client's nation-wide

Our Environmental Health Solution includes:

- ✓ CDP's 'browser' web-based and database-centered environmental health applications feature the ability to generate electronic field inspections, pre-defined and ad hoc reports, accounts receivable, and an easy-to-use management tool for tracking employee activities.
- ✓ Timely information provided to all users
- ✓ Broad analysis across geographic boundaries
- ✓ Increased mobile environmental health staff efficiency through:
 - The utilization of field applications, providing history and data capture
 - Flexible forms design, highly-accurate handwriting data capture and recognition
 - Computer readable and minable data
 - Support for online and offline operation
 - Developed to work offline, CDPMobile allows field staff to conveniently view history, access demographics, and complete data capture while in the field
 - Connection to our comprehensive web-based, enterprise environmental health data system
- ✓ Interoperable systems that are compliant with standards
- ✓ An increased environmental public health capacity
- ✓ The means to enhance and improve data

- ✓ Data centers are CDP owned and operated in the U.S.
- ✓ Fully-staffed software development and maintenance line of business providing architecture, requirements, system design, coding, testing, and implementation and support services.

CDP is the only Environmental Health Software provider with the breadth of Public Health experience including programs such as Clinical/EHR, WIC, WIC EBT, and Data Warehouse.
